EXPERIENCE § 01

JAN 2026 - PRESENT BUILDING

Seemara – Founder. Building in public.

Building an AI products studio. Kaizen is my flagship product. Also take on select client work - I do the whole thing solo as a Vibecoder.

Kaizen.ai

LIVE orchestral-ai-production.up.railway.app · WHAT IS KAIZEN kaizen-docs.vercel.app

- Betting that every AI company will eventually need a product intelligence layer. Marketing knows one version of the product, support knows another, the model sees neither. Kaizen reconciles them.

Divyakala LMS – Sole Technical Partner

LMS divyakala-lms.vercel.app · CLIENT @drdha_art

- Vibe-coded a production LMS for a paying client. Real students, real money, one developer. Trusted as the sole tech partner - platform, features, and website all mine to build and maintain.

JUN 2025 - NOV 2025 INTERNSHIP

BetterPlace – Product Management Intern

Asia's largest HR SaaS, frontline workforce management.

- **SkillBetter LMS - Meesho.**
  - Defined requirements and drove end-to-end delivery of interactive video/image viewport and auto-content builder features on skillBetter LMS.
  - Drove 11% DAU increase across Meesho's frontline learner base post-launch.
- **Skills Framework - NSQF + Singapore SSG.**
  - Led skills-to-role mapping across India's NSQF and Singapore's SSG competency standards.
  - Improved recommendation relevance; contributed to 6% lift in course completion rates.

INDEPENDENT AI BUILDS § 02

SohailCab sohail-cab.vercel.app
A cab driver in Manipal asked for help getting online. Built him a booking and ride-share tool in a weekend. 1 driver, 10 real rides so far. Not a startup. A favor that happens to run on Vercel.

Allen Doubt Solver allen-ai-doubtsolver.vercel.app
Identified a gap in Allen Digital's doubt-solving UX and prototyped a multi-mode AI tutor before they shipped it. Allen subsequently launched a similar feature in their live app.

Day Canvas day-canvas-nu.vercel.app
Daily planner fused with an infinite tldraw canvas. Drag-to-schedule, stamp-the-day task resolution, whiteboard-to-todo bridge.

NoteCode note-code-gilt.vercel.app
Built my own notes tool because Notion and Obsidian did not fit how I think. Markdown-first, AI-augmented, used daily.

More experiments, in progress and shipped — github.com/devvbuilds-png

LEADERSHIP EXPERIENCES § 03

MAY – NOV 2023 — **Diou Linton** – Co-founder, clothing brand — @dioulinton
Ran it for 6 months, wound it down when co-founder relocated.

APR – SEP 2025 — **TEDxMAHE** – Curator & Marketing Head
Curated 6 talks. Led a 30-person team. 28 universities, 35K+ attendance, 50K+ reach.

OCT 2024 – SEP 2025 — **The Think Tank, Manipal** – Marketing & Sponsorships Head
Led a 30-person team. Raised ₹50K. Committee member to head over 2.5 years.
